Below is a partial list of people that I need to thank for supplying content, advice, and feedback.

- Stan Yoshinobu (Cal Poly) and Matthew Jones (CSU, Dominguez Hills). A few of the sections were originally adaptations of notes written by Stan and Matt. The first version of these notes relied heavily on their work.
- Dave Richeson (Dickinson College). Dave is responsible for much of the content in Chapter 5: Two Famous Theorems, Appendix B: Fancy Mathematical Terms, and Appendix C: Definitions in Mathematics.
- Jason Grout (Bloomberg, L.P.). I'm extremely grateful to Jason for helping me with a variety of technical aspects of writing these notes.
- Paul Ellis (Manhattanville College). Paul corrected several typos and provided lots of useful feedback.
- Anders Hendrickson (St. Norbert College). Anders is the original author of the content in Appendix A: Elements of Style for Proofs. The current version in Appendix A is a result of modifications made by myself with some suggestions from Dave Richeson.

Contents

1 Introduction **3**
- 1.1 What is This Course All About? . . . 3
- 1.2 An Inquiry-Based Approach . . . 4
- 1.3 Your Toolbox, Questions, and Observations . . . 5
- 1.4 Rules of the Game . . . 6
- 1.5 Structure of the Notes . . . 6
- 1.6 Some Minimal Guidance . . . 7

2 Mathematics and Logic **8**
- 2.1 A Taste of Number Theory . . . 8
- 2.2 Introduction to Logic . . . 10
- 2.3 Negating Implications and Proof by Contradiction . . . 14
- 2.4 Introduction to Quantification . . . 16
- 2.5 More on Quantification . . . 18
- 2.6 And Even More on Quantification . . . 21

3 Set Theory and Topology **25**
- 3.1 Sets . . . 25
- 3.2 Power Sets and Paradoxes . . . 28
- 3.3 Indexing Sets . . . 31
- 3.4 Topology of $\mathbb{R}$ . . . 35

4 Induction **39**
- 4.1 Introduction to Induction . . . 39
- 4.2 Additional Induction Exercises . . . 41

5 Two Famous Theorems **42**
- 5.1 The Irrationality of $\sqrt{2}$ . . . 42
- 5.2 The Infinitude of Primes . . . 44

6 Relations and Functions **46**
- 6.1 Relations . . . 46
- 6.2 Equivalence Relations . . . 49
- 6.3 Partitions . . . 51
- 6.4 Introduction to Functions . . . 53

6.5 Compositions and Inverses 57
6.6 Order Relations 58

A Elements of Style for Proofs **59**

B Fancy Mathematical Terms **64**

C Definitions in Mathematics **66**
